

RESEARCH SUBJECTS WANTED

Researchers at the Massachusetts General Hospital Martinos Center seek subjects for a brain imaging study for better understanding of neural mechanism associated with perceptual decision-making.

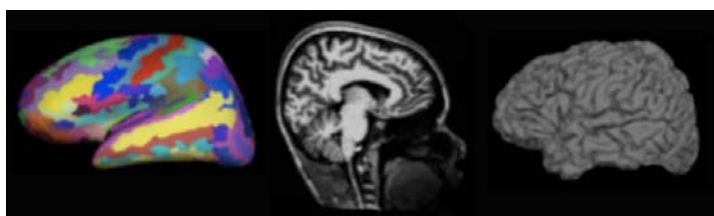

The study will take place at the Martinos Center, MGH, 149 Thirteenth Street, Charlestown, MA 02129. The Principal Investigator of this study is Dr. Yuka Sasaki, Mass Gen Hospital, Assistant Professor at Harvard Medical School.

Participants must:

1. Be 18-40 years of age
2. Have good vision (with optical correction if necessary)
3. Be able to have an MRI (not pregnant, no metal implants etc)

Qualified subjects will be paid \$10/h for behavior session (about an hour). Depending on the behavioral results, additional one MRI session (1-2 hours) may also be involved (\$25/h for MRI session).

If you are interested in volunteering for or learning more about this study,
