Volunteers needed for Research study

Massachusetts General Hospital (MGH) and Harvard Medical School seek healthy volunteers to participate in a study on the effects of genes on brain function.

A volunteer must meet the following criteria:

- English must be her/his native language
- Must be in good general health with no history of psychiatric or neurological problems
- Must be between ages 18 and 60 years
- Must have good eye-sight with or without glasses or contact lenses

We will compensate each volunteer up to $190.

If you meet the required criteria and would like to help the lab understand links between genes and brain function, then, for more details please
